Mazhar Hussain, PhD

Aspiring Clinical Trial Researcher

Canberra, ACT

0493 514 898

mazharotagou@gmail.com

Profile

GCP-certified research professional with over 7 years of experience managing multi-institutional biomedical research projects and maintaining audit-ready documentation. Experienced in participant coordination, informed consent processing, sample logistics, and data quality control across preclinical and translational studies. Skilled in REDCap, Medrio, MS Excel, and governance documentation aligned with institutional standards. Dedicated to clinical trial excellence, regulatory compliance, and collaborative project delivery.

Work Rights & Compliance

- Permanent resident of Australia (visa subclass 189)
- Full driver's licence (Manual/Automatic)
- Nationally Coordinated Criminal History Check Certificate (Issued on 30/09/2025)
- Current Working with Vulnerable People (Issued by ACT Government)

Skills Summary

- Experienced in high-volume data entry and quality control, including double-entry verification and spot-checking to ensure data integrity.
- Skilled in preparing and maintaining source documents, version control logs, and audit-ready records aligned with institutional and GCP standards.
- Competent in participant scheduling, visit documentation, and call note recording, ensuring accurate tracking of study activities.
- Proven ability to manage sample logistics, including labelling, temperature monitoring, and full chain-of-custody documentation.
- Familiar with ethics and governance submissions, ensuring SOP compliance.
- Proficient in REDCap, Medrio, Excel (Pivot tables, lookups), SharePoint/OneDrive for data management and collaboration.
- Experienced in basic vendor and purchase order tracking, equipment inventory, and calibration log maintenance.
- Strong organisational and communication skills, with a disciplined approach to timelines, documentation, and stakeholder coordination.

Certifications and Professional Development

- ICH Good Clinical Practice E6(R3) certificate provided by The Global Health Network
- Data Capture and Surveys with REDCap at University of Canberra Online (02/10/2025)
- Medrio: eConcent Builder provided by Medrio (29/10/2025)
- Medrio Data Management provided by Medrio (04/11/2025)
- Privacy in Practice (Office of the Australian Information Commissioner)

- Project Management Foundations: Risk (Project Management Institute)
- Project Management Foundations: Budgets (Project Management Institute)
- Managing Project Stakeholders (Project Management Institute)
- Agile Project Management with Microsoft Project (CPE: 2.40; National Association of State Boards of Accountancy)
- The Complete Agile & Scrum Project Management Course (Provider: Udemy)

Professional Experience

Senior Research Officer **Dec/2022 - Dec/2025**

John Curtin School of Medical Research, Australian National University

Research focus: Small-cell Lung Cancer

- Supported an $8 million multi-institutional program (ANU, WEHI, and Monash University), coordinating complex research activities and ensuring alignment with project goals, reporting obligations, and compliance requirements.
- Collaborated across diverse research teams and stakeholders, providing operational leadership in study design, experiment execution, and data reporting.
- Applied rigorous attention to detail in maintaining accurate data records, preparing technical reports for funding bodies, and ensuring compliance with institutional SOPs, biosafety regulations, and ethical standards.
- Oversaw multiple large-scale screening projects that required complex protocol adherence, version control of experimental records, and verification of data accuracy.
- Conducted bioinformatics and statistical analysis, interpreting results and communicating findings in clear, concise reports for regulatory stakeholders.
- Mentored and supervised Honours/PhD students and technical staff, instilling best practices in safety, record-keeping, and protocol fidelity, while also promoting effective teamwork and communication.
- Drafted manuscripts and contributed to a high-impact publication (under preparation), demonstrating the ability to translate complex data into clear, evidence-based outputs for varied audiences.
- Operated within certificed PC1 and PC2 facilities under strict biosafety and compliance frameworks, embedding a strong culture of governance, accountability, and quality assurance.

Postdoctoral Research Fellow **Apr/2021 - Sep/2022**

Department of Biochemistry, University of Otago

Research focus: Plant Sex Differentiation

- Designed/optimised protocols and maintained detailed laboratory/source records to support reproducibility and QA.
- Conducted data integrity checks and prepared reports/presentations for internal governance and funding submissions.

Assistant Research Fellow **Mar/2020-Apr/2021**

Department of Pathology, University of Otago

Research focus: Human papillomavirus/cervical cancer and COVID-19

- Supported clinically relevant research by engaging with patients for recruitment into cervical cancer studies, including obtaining consent and coordinating the collection of plasma samples, ensuring adherence to ethical and privacy standards.

- Processed and analysed biospecimens for both HPV/cervical cancer projects and a COVID-19 serological study, maintaining meticulous sample records and ensuring data accuracy.
- Contributed to public health surveillance through antibody titre analysis from New Zealand Blood Service donors, producing reliable datasets to inform broader health decision-making.
- Coordinated ethics submissions and research governance approvals, gaining experience in navigating compliance requirements and ensuring study protocols aligned with institutional and regulatory expectations.
- Managed project documentation, including source data records and study reports, fostering transparency, audit readiness, and compliance.
- Organised project timelines and resources, ensuring experiments and patient-related sample collections were completed within schedule, demonstrating skills in coordination and operational management.
- Oversaw procurement and laboratory logistics, maintaining uninterrupted project workflows and supporting team productivity.

Research Assistant **Mar/2019-Mar/2020**

Department of Microbiology and Immunology, University of Otago

Research focus: Listeria monocytogenes infection

- Processed and maintained community-derived Listeria monocytogenes isolates from clinical and environmental sources, ensuring the integrity of biospecimens and reliable downstream analyses.
- Conducted host-pathogen interaction studies under strict PC1 and PC2 compliance, reinforcing strong adherence to biosafety, quality, and regulatory requirements.
- Maintained accurate experimental documentation, contributing to reliable data capture and transparent project reporting.
- Collaborated with supervisors, technical staff, and external stakeholders to coordinate project activities, ensuring timelines and objectives were met.
- Assisted with literature reviews and manuscript preparation, developing skills in clear scientific communication, data presentation, and reporting for diverse audiences, including regulatory bodies and academic peers.

Teaching and Volunteering Experience

Chair of Genome Science Seminar **Jan/2024-Dec/2025**

John Curtin School of Medical Research, Australian National University

- Lead the planning, coordination, and delivery of the Genome Science Division's seminar series, ensuring high-quality presentations aligned with the division's strategic research priorities.
- Foster cross-disciplinary collaboration by engaging internal researchers, faculty, and external experts to present on emerging topics in genomics and biomedical science.
- Facilitate knowledge exchange across research groups and promote an inclusive academic environment that supports professional development and scientific dialogue.
- Manage communications, scheduling, and logistics for all seminar events, maintaining consistent engagement and participation.

Floor Warden **Jan/2024-Dec/2025**

John Curtin School of Medical Research, Australian National University

- Trained in emergency response procedures and building evacuation protocols.
- Ensured safe and orderly evacuation of staff and students during drills and emergencies.
- Conducted routine checks of safety equipment and reported hazards or issues to relevant authorities.
- Acted as a point of contact between building occupants and emergency services during incidents.

Postgraduate Representative **Mar/2017-Dec/2018**

Department of Microbiology and Immunology, University of Otago

- Acted as liaison between students and staff, attending departmental meetings, coordinating communications, and conveying student feedback.
- Coordinated and organised postgraduate symposiums.
- Provided recommendations to improve the student representation system.

Laboratory Demonstrator **Mar/2017-Oct/2018**

Department of Microbiology and Immunology, University of Otago

- Delivered practical instruction and support across six undergraduate courses.
- Demonstrated laboratory techniques and guided students through experiments, ensuring lab safety compliance.
- Assisted the course convener with assessment and feedback.

Education

Doctor of Philosophy - Microbiology **2015-2020**

Department of Microbiology and Immunology, University of Otago

- Thesis: The anti-influenza viral mechanism and viral antagonism of host histone deacetylase 6

Master of Philosophy - Molecular Biology **2011-2013**

National Centre of Excellence in Molecular Biology, University of the Punjab

- Thesis: Cloning and expression of consensus interferon in *Pichia pastoris*

Bachelor of Science (Hons) - Microbiology and Molecular Genetics **2007-2011**

Department of Microbiology and Molecular Genetics, University of the Punjab

- Thesis: Characterisation and optimisation of phytase from yeast isolated from industrial wastewater

Awards and Achievements

- Awarded 2000NZD by Division of Health Sciences, University of Otago to Participate in 37th annual meeting of American Society for Virology, University of Maryland, United States (2018)
- Awarded 2000NZD by Department of Microbiology and Immunology, University of Otago to Participate in 37th annual meeting of American Society for Virology, University of Maryland, United States (2018)
- Awarded 1000NZD by Maurice and Phyllis Paykel Trust Travel Grant to Participate in 37th annual meeting of American Society for Virology, University of Maryland, United States (2018)

- Won ”Best Virus-Host Interactions Poster” Certificate and Received 100NZD as Prize Money, Department of Microbiology & Immunology and Department of Biochemistry Research Celebration (2017).
- Recipient of multiple other competitive travel grants and merit scholarships recognising research excellence.
